PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with a strong foundation in software development and problem-solving. Currently developing an Online Resume Builder using Python. Passionate about technology, innovation, and creating user-friendly applications. Also, a 5-time state gold medalist in archery with national-level achievements, demonstrating discipline and perseverance.

WORK HISTORY

Software Testing Intern

January 2025 – June 2025

InnoSoft Labs

- Designed and executed comprehensive test plans to identify functional and performance issues.
- Automated regression test cases using Selenium WebDriver, reducing manual testing efforts by 50%.
- Logged, tracked, and managed defects efficiently using Jira, ensuring timely resolutions.

Frontend Developer Intern

August 2024 – November 2024

PixelPlay Technologies

- Developed interactive and responsive UI components using React.js for a real-time dashboard.
- Integrated dynamic visualizations with Chart.js and external APIs to display live data trends.
- Optimized frontend performance and ensured seamless user experience across devices.

Junior Python Developer

January 2024 – May 2024

CodeCrafters Pvt. Ltd.

- Engineered RESTful backend services using Python and Flask for a scalable ticket booking system.

- Designed and implemented MySQL database schemas to efficiently manage user and transaction data.
- Collaborated with frontend and QA teams to deliver secure and high-performing application modules.

PROJECTS

Resume Builder

Developed a Python-based desktop application to create, edit, and customize professional resumes. Users can choose from multiple templates, auto-fill key sections, and export resumes in PDF & DOCX formats. The app supports saving multiple resumes locally, offering a smooth and user-friendly experience.

Technologies: ['Python', 'SQL', 'HTML', 'CSS', 'JavaScript']

Smart Inventory Manager

Designed and built a full-stack web application for real-time inventory tracking and management tailored for small businesses. Implemented features like product categorization, low-stock alerts, and automated reporting.

Technologies: ['React.js', 'Node.js', 'Express.js', 'MongoDB', 'Bootstrap']

CampusConnect

Developed a mobile application that allows college students to connect and collaborate on academic projects. The app supports chatting, resource sharing, event creation, and project groups.

Technologies: ['Flutter', 'Firebase', 'Dart', 'Figma']
